Art Unit 1652

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-5, 7-21, drawn to a DNA expression construct comprising a gene encoding streptokinase, methods of producing streptokinase using said expression construct, host cells comprising said expression constructs, classified in class 435, subclass 194.
- II. Claim 6, drawn to methods of producing streptokinase comprising transforming the host cell with the above mentioned expression construct wherein an extra BRP gene producing preamble zones in the host cell's envelope, is inserted, classified in class 435, subclass 194.

The inventions are distinct, each from the other because of the following reasons:

The inventions of Groups I-II are patentably distinct because each method has different steps and different end-points.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any

amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
